

It Happened TODAY

World

Honorable Brooke Claxton, minister of national defence, commended the armed services for their work in the B.C. flood emergency. A special bouquet went to reserve forces members, "who so loyally responded when called upon. For many this meant a considerable sacrifice of their own personal affairs," said he.

Prime Minister Mackenzie King indicated to the Commons that he will attend the forthcoming conference of Commonwealth Prime Ministers in October despite his expected resignation in August. Attlee, he said, has expressed the wish that he attend the meeting personally.

F. C. Erasmus, South African defense minister, said in Pretoria that in future no Africans or other colored people in South Africa will receive military training or be allowed to carry arms.

The British Medical Association, because of what they term "initiative suicide," has sent a resolution to the Home Secretary asking that reporting of suicide inquests be restricted.

Graduating officers of Canada's Kingston Defense College visited Lake Success, where General A. L. McNamara told them the UN is stopping wars. They were also told the formation of a UN military force was being delayed by deadlocks with the Russians.

Progressive Conservative leader John Bracken, speaking at Clear Lake, Manitoba, said Canada's wild life resources are being "sold out" to meet the U.S. dollar shortage. Some "sportsmen," he said, are killing enough game that sale of the meat, when they return home, more than pays the expenses of the trip.

DEFENSE MINISTER CLAXTON

... Sacrifice was noble.

British informed sources have termed a prediction by Prime Minister King, that the King and Queen might, in future, live part of each year in Canada, as "perfectly logical." Said one: "Where the King is, there is in fact the only capital of the Commonwealth and Empire," be it in London or Ottawa.

Rail Unions To Strike July 15

(Continued From Page 1)

ferred to the employees represented by the organizations, who are covered by the various agreements with these railways, their subsidiaries and their affiliates," the latter said. "The employees have almost unanimously to withdraw from the service if no satisfactory agreement is effected."

PEACEFUL WITHDRAWAL

"The negotiating committee has considered the matter in the light of this expressed intention, and is directed to advise you that a concerted and peaceful withdrawal from the service will take place on Thursday, July 15, 1948 at 6:00 a.m. regional Standard Time. Employees in train service will withdraw at the end of their runs."

"The negotiating committee is not unmindful that, at the instance of the minister of labour, mediation proceedings have been made available to the parties. If by such other means it appears that some settlement can be reached, the committee will gladly give its co-operation up to the date indicated for the withdrawal from service. However, the exigencies of the situation are such that the committee cannot accept the responsibility for any further delay in the matter thereafter."

FEW VOTED AGAINST

"Only a comparative handful," he said, "voted against the strike and there were a few spoiled ballots. Never before has such emphasis been given to the strong feeling of the employees concerning deterioration of their living standards and their relatively unfair treatment compared to workers in most other industries regarding wage increases."

He said the negotiating committee was remaining in session to work out details about the conduct of the strike.

The announcement was made on the eve of resumption of mediation proceedings by a board headed by Mr. Justice J. C. A. Cameron.

The board, which sat originally as a conciliation board and turned in a majority report recommending

People

In Wheeling, W. Va., Marjuth Ford, 18, Roman Catholic parishioner, today refused to withdraw under threat of excommunication from Bishop John Swift of the Wheeling Catholic Diocese, went ahead to win the contest, and be named "Miss Wheeling."

KING GEORGE VI. ... Capital will follow.

Commerce

In Digby, N.S., a New England delegation, headed by Massachusetts governor Robert Bradford is meeting Canadian officials to discuss improvement of trade and relations between the Canadian Maritimes and northeastern United States.

Politics

Mayor V. M. Rae of Medicine Hat, who authorized purging the city library of nearly half its books as "obsolete," is still on top of the "Book War." Posters atop his recall contained 1,255 signatures. They require 1,408 under the city's charter.

Crime

Jerry Malek, Chicago gunman under arrest for the gambling house shooting of two Chicago policemen, told police he had escaped the biggest man-trap in Cook County history by simply walking to a highway, climbing on a bus and going home. Three others escaped by swimming the Desplaines river and are believed to be in or headed for Wisconsin.

John Haverkamp, Baltimore, was slugged and robbed of \$70. In 1946 his brother dissuaded two bandits by shooting one and beating the other with an iron bar. In 1946, the brother shot one of a trio of would-be robbers. This time, the battling brother wasn't in.

Housing

The government announced today that during the first three months of 1948, for the first time since the war, the supply of some building materials exceeded the demand. The items: Mostly electrical and plumbing equipment, plus builders' hardware and gypsum wallboard.

A seven-cent wage increase, was recommended by the federal labor minister to avert a nation-wide strike. The conciliation board's report had been rejected by the Brotherhoods and the unions had begun taking a strike vote.

SITTINGS SUSPENDED

Another mediation board, hearing a similar dispute between the railways and the Canadian Brotherhood of Railway Employees and other transport workers (CBRE) suspended sittings several weeks ago, when it was unable to settle the disagreement.

CBRE officials announced some time ago that their membership of 28,000 had voted 97 per cent in favor of a strike but the Canadian union has set no strike date.

The International Brotherhoods' unions involved are the Brotherhood of Locomotive Firemen and Engineers; Order of Railway Conductors; Brotherhood of Railway Trainmen; Order of Railroad Telegraphers; Brotherhood of Maintenance of Way employees; International Association of Machinists; Brotherhood of Railway Carmen; Association of American Railroad Employees; Brotherhood of Carpenters and Joiners of America; International Brotherhood of Blacksmiths; Drop Forgers and Helpers; Sheet Metal Workers' International Association; Electrical Workers' United Association of Journeymen Plumbers and Steamfitters of the United States and Canada; International Brotherhood of Foundry Workers; Union of North America; Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; International Brotherhood of Firemen and Oilers; Roundhouse and Railway Shop Laborers; Brotherhood of Railroad Signalmen; Brotherhood of Commercial Telegraphers Union; Hotel and Restaurant Employees International Association; and International League of America.

Government Awards Road Contract

A quarter-million dollar road grading contract has been awarded by the provincial public works department. It was announced today by G. H. N. Monkman, deputy minister.

Contract was awarded to Asinibolts Engineering Co. of Calgary, for grading of the highway between Gleichen and Bassano. Value of the contract was \$250,000.00.

CBC Short-Wave

'Drain' On Taxpayer

OTTAWA, June 29.—(CP)—Canadian Broadcasting Corporation expenditures came under criticism in the Commons today.

Rev. E. G. Hanes (SG-Macdonald) called the corporation and the government's international short-wave service a "tremendous drain on the taxpayer."

Fourteenth Case Of Polio Reported

On new case of poliomyelitis was reported today by Dr. A. Somerville, provincial director of communicable diseases.

The case, 14th reported in Alberta so far this year, is that of a 16-year-old girl at Tupper Creek, in the Grande Prairie district.

100th Suicide

SAN FRANCISCO, June 29.—(AP)—The Golden Gate Bridge attracted its 100th suicide yesterday when a man identified as Fortunato Angino jumped 240 feet into San Francisco Bay. In 11 years since the bridge was built, only two persons have made the jump and lived.

Young Farm Hand On Trial for Life

41 Exhibits Entered As Crown Opens Case

ST. PAUL, June 28.—A shotgun and an empty shotgun shell were exhibited by police here Monday as the instrument which murdered William Pacholek, Spedden farmer.

The weapon headed a list of 41 exhibits entered by RCMP investigators in the preliminary hearing of a charge of murder against Mike Zacharuk, 21-year-old farm hand of Hairy Hill.

The blasted body of the 34-year-old farmer was found June 1 in a ditch of the Hairy Hill Road district, about 20 miles from the scene of the shooting.

Zacharuk was arrested and formally charged with murder June 3.

Dr. John W. Macgregor, University of Alberta pathologist, and first witness called at the hearing, testified that Pacholek had died after his skull was shattered by a shotgun blast.

He displayed a shotgun pellet which he had removed from the shattered victim's head.

He estimated that the body had been exposed to the weather for two or three weeks before being discovered.

Police believe the shooting occurred about May 13.

Dr. Macgregor testified that there was a gaping hole in the back of the skull, and that no brain tissues remained within.

Expert RCMP investigators testified at the hearing.

Ballistics expert Sgt. Andrew Macdonald, brought from Regina for the investigation, told the court an empty shotgun shell picked up near the supposed scene of the crime had been fired by the shotgun entered as an exhibit.

The gun was found after both Pacholek and the accused had been reported missing.

CLOSE RANGE Tests, the sergeant said, showed the gun had been fired at close range.

A cap, entered with clothing of the dead man, was shredded at the back, allegedly by the lethal blast.

Samples of soil, portions of a plow, and clothing showed traces of human blood, testimony of Staff Sergeant John Mallow disclosed.

Analysis of bloody soil samples tied discovery of the body to the scene of the crime.

Cpl. Tommy Richards, Edmonton, entered as evidence charts of the area where the dying animal took place and of where the body was found.

A pair of overalls, seized from the home of Nick Zacharuk, Hairy Hill, also revealed traces of human blood, he said.

He told the court that a board, taken from the rear of Pacholek's car, had been cleaned off with a cloth, and traces of damp earth or some other substance removed.

Zacharuk had been charged with theft of the auto before the discovery of Pacholek's body.

When the murder charge was laid, the charge of theft was withdrawn.

Police investigation of the incident began with the report by a brother of Pacholek, that the farmer and his hired man were missing.

The report caused the indignation

CJCA Replies To Henry Charges

CBC Board Hears 10,000-Word Brief by W. A. MacDonald

MONTREAL, June 29.—(CP)—The Edmonton Broadcasting Company in a series of briefs read today before the CBC board of governors flatly denied allegations of Gordon S. Henry that station CJCA Edmonton operated with lack of freedom and charged Mr. Henry with being a disgruntled employee whose specific allegations were trivial and exaggerated.

Mr. Henry, resigned manager of the station, appeared before the board last May 19 and presented a brief, asking that the licence of the station be cancelled.

The main reply today was a 10,000-word brief by W. A. MacDonald, president of the Edmonton Broadcasting Company, licensee of CJCA.

Other briefs were presented by Harold B. Carson, general manager of the Edmonton Broadcasting Company; Hugh E. Pearson, vice-president, and James M. Taylor, a director.

Other briefs were presented by Harold B. Carson, general manager of the Edmonton Broadcasting Company; Hugh E. Pearson, vice-president, and James M. Taylor, a director.

He did not phone Mr. McCallum "incumbent day and night." There were three calls on "the day," occasioned by continued omission of one side's views from a news item. This happened through a misunderstanding of station employees and finally, a night broadcast by lack of time and the item, last on the script, was dropped.

Mr. MacDonald said this was the only occasion he asked for inclusion of an item referring to the printers' strike and never before or since has he requested CJCA to broadcast "any news item on any subject where he is still employed."

Mr. MacDonald left CJCA "for personal reasons in no way related to the incident mentioned by Mr. Henry," and "far from the incident having disturbed his relations with the Southern interests, he left station CJCA to take employment with the Southern newspaper in Vancouver, and Vancouver Daily Province, where he is still employed."

Mr. MacDonald replied to Mr. Henry's specific allegations:

1. In 1946 news commentator Stan Ross and Edmonton lawyer, "ran a foul of an editorial in the Edmonton Journal" and Mr. MacDonald indicated that if no decision could be reached while the board "fights against time," an announcement may come later from Ottawa.

Mr. MacDonald replied to Mr. Henry's specific allegations:

COURTROOM JUST A BIGGER FIELD

TOKYO, June 29.—(AP)—Hideo Miyama, 26, got a one-year sentence for petty theft. He then he—

Was caught trying to sneak away with the court's clock after a hearing of his appeal. Admitted pilfering an umbrella belonging to his own lawyer.

Confessed stealing the regulation cap of the police officers who interrogated him. "You're incurable," said the judge. "I add one year or more to your earlier sentence. But I don't think it's enough."

Elks Meet

July 26-28

Annual convention of the BPO Elks will be held in Edmonton July 26 to 28.

Features will include a Klondike night, Lakeview night, Trocadero night, Pow Wow, western barbecue, and side trips.

Hosts at the convention will be Edmonton branch No. 11, BPOE.

Airforce Band Goes On Tour

Edmonton's RCAF band leaves tonight for a week-long visit to Manitoba.

The airforce bandmen will appear at the Brandon, Man., exhibition, July 2 and 3 at the International Air Show at Winnipeg, and then will accompany Edmonton auxiliary and air cadet squadrons to summer camp at Gimli, Man.

The band will return to Edmonton July 7, in time for annual inspection of the RCAF station here by Air Vice Marshal Guthrie, CB.

Dance in aid of B.C. flood victims will be held in the North West Air Command drill hall on Kingsway avenue, with the RCAF band supplying the music.

Horseshoe Fans To Meet Friday

A meeting to organize a city-wide horseshoe tournament will be held in the Recreation building, 10280 100 street, Friday at 7 p.m.

Pitches have been provided on 100 street and 102 avenue and spots are available from the caretaker of the recreation building.

other station" and Mr. Henry agreed. The conversation was in a jocular vein.

Mr. MacDonald said the facilities of CJCA "have always been available to The Bulletin for advertising purposes and have indeed been used by The Bulletin both before and since the incident mentioned."

Howard Chase, board member, said if a station manager lacked the nerve to report alleged interference, as contained in Mr. Henry's allegations, "we could drift into a serious situation."

Mr. MacDonald's reply termed this a "distortion of facts." He was told in a "chance conversation" with Mr. Henry that The Bulletin had approached the station for announcements. Mr. MacDonald then said he would prefer The Bulletin advertise over "the

TERMED A 'FABRICATION'

Mr. MacDonald, in reply, termed this a "fabrication by Mr. Henry." All Mr. MacDonald sought was "an expansion of the news, not a restriction, so as to give both sides of the strike story."

TEACHERS NOTE: LOTS OF JOBS

Attention teachers! Many good situations in rural and town schools for teachers for all grades from beginners to high school, including principals will be advertised in The Bulletin classified section during July and August.

Watch classification 23 for vacancies in the teaching profession, which will be advertised daily in Bulletin columns.

Two Cyclists Are Injured

Two city cyclists suffered injuries Monday in accidents on city streets.

Lawrence Neuman, 10748 105 street, suffered bruises to his left arm, and a bump on his head when he ran into a dog at 109 street and 105 avenue at 8:30 p.m.

Joseph Acker, 10619 103 street, suffered a knee injury when he was struck by the box of a passing truck at 101 street and 102 avenue, 8:30 p.m.

Acker said he swung out to pass a double-parked car when the box knocked him to the pavement.

Cosmos Hold Final Meeting

Last meeting of the Cosmopolitan Club for this season was held today in the Corona hotel with President John G. Norrington presiding.

Next meeting of the Club will be held September 11, when the new slate of officers, headed by president-elect Oliver Macdonald, will be installed.

Cadets Flown To RCAF Camps

Air cadets from four squadrons in northern Alberta and B.C. will be flown to summer camps at Patricia Bay, Vancouver Island, North West Air Command announced today.

Personnel from the four squadrons, at Peace River, Sexsmith, Fairview and Dawson Creek will be flown by RCAF in a Lancaster bomber and two Dakota transport craft.

Sixty-five cadets and officers will be flown from the three bases at Peace River, Grande Prairie and Dawson Creek.

The cadets are going for two weeks' training and will be taught airmanship, technical trades, swimming, armament in addition to given actual experience in aircraft.

For many of the cadets, this will be the first visit to the west coast. While at the camp, tours have been arranged to show the future airman points of interest on Vancouver Island.

U.S. Group to Study Northern Plant Life

Effects of radio-active soil of Fort Radium, N.W.T., on plant life will be studied this summer by a group of five botanists who reached Edmonton Monday evening enroute north.

The group, headed by Dr. William C. Steere, professor of botany, University of Michigan at Ann Arbor, are carrying out the research through the U.S. Office of Naval Research and the University of Michigan.

Other members of the party are Professors James Kucvick, Mort-wood Botanical Garden; Edwin A. Phillips, Clairmont; Robert J. Lowry and H. T. Shacklette, from the University of Michigan.

The botanical experts will make a six-week study of the plants in the soil, and will later make their reports to the U.S. Office of Naval Research.

It is part of a gigantic program being carried out by the United States to gather further information on nuclear energy.

It is the first time this summer any members of the group have headed north in search of information on Canada's northland.

French agriculture has little mechanization but the quality of livestock, with the exception of swine, is high.

Roy C. Marler of Bremner, president of the Alberta Federation of Agriculture, described his recent trip to France to attend a meeting of the International Federation of Agriculture, to the annual banquet of the Alberta Livestock Co-operative Ltd. Monday night.

Mr. Marler was guest speaker at the banquet, held in connection with the eighth annual convention of the ALC Monday and Tuesday in the IOOF hall. Banquet was in the Corona Hotel.

Some idea of the absence of mechanization in French agriculture was obtained by Mr. Marler in the fact he saw only five tractors in a trip right across France from east to west.

INVASION FEAR

Possibly one reason why the French hesitate to mechanize the farms lies in their fear of another invasion.

"We cannot eat tractors," they say. Most farm work is done by horses and oxen.

Draft horses and dairy cattle are of a very fine type, however, possibly better than in Canada, although they are not much attention paid to breeding beef cattle, the French said.

The breeding of bacon hogs is far behind and the French government is just starting to improve the swine strain.

WINE GROWERS

He told of visits to French wine growing districts and a potato mine.

Because of attention to crop rotation and fertilizing, the soil of France is said to be just as fertile as it was 200 years ago.

C. P. Hays, ALC president and among head table guests were: President Hugh Allen, Mayor Harry Ainlay, O. S. Longman, deputy minister of agriculture, Carl J. Stimpfle, president of the Alberta Farmers' Union; J. R. Love, Ben Plummer, chairman of the Alberta Wheat Pool; T. E. Hawley, ALC delegate from Dawson Creek; R. M. MacCrimmon, R. E. Chelien, directors, ALC and J. J. McEwen, director of the United Grain Growers.

ette lighter and case, and a bag, were reported taken from the house.

Entry was gained by removing a screen in the bathroom window, police said.

Vandals who broke into Reid Construction, 142 street and 107 street, caused considerable damage with paint.

Cans of paint and grease were dumped on the floor and tools were thrown around inside the building, police said.

Mike Neitzel, told police nearly 65 pounds of nails were stolen from a house under construction at 11559 69 street Monday night.

Damage to another house under construction at 11209 105 street, was reported by Roy Travers.

A doctor's bag was taken from a car owned by Dr. W. S. Niewchua at 104 street and Jasper avenue, 11241 66 street, Monday afternoon.

A dress top, man's jacket, cigarette lighter and case, and a bag, were reported taken from the house.

Noon-Hour Thieves Gain Small Loot

Thieves operating in broad daylight Monday, looted an office cash register, and ransacked a house, according to police reports today.

Only three dollars in cash was obtained by thieves who broke into a Steele Briggs Seed Co. warehouse at 9655 102 avenue, during Monday luncheon.

Mrs. J. M. Mowbray, stenographer at the warehouse, told police she found the cash register on the floor after returning to the office at 1 p.m.

The till had been splintered open and the bottom ripped out. Mrs. Mowbray stated.

Thieves left a small quantity of silver change on the floor and walked with three dollars, police said.

Doors in the building were locked at noon when the staff left for lunch, Mrs. Mowbray stated.

A variety of loot was gained by house prowlers who broke into the home of Mr. Stanley Emmott, 11241 66 street, Monday afternoon.

A dress top, man's jacket, cigarette lighter and case, and a bag, were reported taken from the house.

Entry was gained by removing a screen in the bathroom window, police said.

"Because I've arranged that—

if I live, I will be able to retire comfortably

if I become totally disabled, I will still have a fair income

Right Kind of Settlers

Those 150 immigrants from Britain who arrived in Edmonton yesterday are a sample of the kind of settlers this country needs.

They will go into farms and into industry and will contribute to the production of Canada and therefore to Canada's wealth because production is the only source of wealth.

But, most of all, these British settlers will not require special training in the British way of life which is the Canadian way of life.

There will be no language barriers to be broken down, no non-Canadian traditions to be shed, no continental feuds and grudges to be shaken off.

And there will be no huddling off into isolated communities where some of our immigrants strive to perpetuate alien customs.

Canadian Babies to the U.S.

The federal government says that the adoption of Canadian babies by citizens of the United States is causing "grave concern" to the department of external affairs and to the attorneys-general of several provinces.

If there is any indication that harm is being worked upon the exported babies, Ottawa can stop the practice very simply by refusing passports to permit the children to leave the country.

Last year 189 passports were issued to infants for this purpose. So far this year there have been 59.

The chief objections to this traffic across the line in adopted babies seem to be three:

1. That the practice constitutes an additional emigration drain on this country, a drain that already amounts to about 21,000 Canadians moving to the United States every year.

2. That the adopted babies, moving out of Canadian jurisdiction, are no longer subject to the control and protection of

doms and thinking and languages on Canadian soil.

There is no intention of making here an invidious comparison between settlers of British origin and settlers of non-British origin.

People from all the countries of Europe have made a magnificent contribution to the building of Canada and citizens of almost all racial strains have added immeasurably to the citizenship of this country.

But the British settler has the obvious advantage in having fewer handicaps to overcome before complete absorption into the life of Canada.

This drive for British immigration is a wholesome and valuable step towards the enlargement of Canada's production and Canada's importance in the world.

Canadian law.

3. That there are plenty of Canadian homes ready to take these homeless children and that sometimes Canadians have to go to the United States to secure babies for adoption.

It is difficult to see why there should be any great heartburning about any or all of these objections.

Surely an emigration drain of 189 babies in a year is not particularly serious, especially when it is admitted that an unspecified number of American babies are being brought into Canada for adoption.

So far as protection is concerned, the United States has a very extensive system of law to prevent the ill-usage of children.

About the only valid objection to the practice is that Canadians should have first choice of Canadian babies for adoption. That seems sound enough.

There seems to be something a trifle spurious about this "grave concern" when the department of external affairs could stop the practice in a moment.

Esperanto

Editor, Bulletin.—On the four days commencing July 2nd the Esperanto Association of North America will hold its annual congress in Toronto. In August the World Congress of Esperantists takes place in Malmo, Sweden.

Many people are under the impression that the international auxiliary language, Esperanto, which was invented in 1889 by W. Zamenhof, died long ago; but the remarkable fact is that the language is still making progress. In many countries throughout the world. It is taught in several universities and in many of the students of Toronto university—and has the official support of some national governments.

The writer, who learned the language over forty years ago, has proved the practicability of Esperanto by using it in several countries of Europe. The thing works wonderfully, but whether the world will take advantage of Esperanto, which is as neutral as the telephone, or whether it shall have to wait until a slow evolution of a world language takes its course, remains to be seen.

Increased rapidly of travel, the radio and the numerous international congresses, all tend to remind us of the ever-present language problem. Esperantists think that they have quite a good answer.

How terribly vulgar!

What has happened to crime among the nobility?

Can it be that the underworld, realizing the plight of the peerage under a socialist government, has refrained from slaking titles persons on the general principle that it is not sporting to pot a

batting bird.

Whatever it is, I am getting darn good and tired of mixing up with effluvia in my literary circles.

It is showing up in my manners, too. The other day I actually caught myself blowing on my soup.

Hard-Boiled Detectives

But the real degeneracy of the mystery tale reveals itself in the kind of uncouth fellows who solve the crimes.

The hero of most of the current thrillers is a private eye who (a) shows up the police as a bunch of ninnyes, (b) consumes at least three quartets of whisky per chapter, (c) shoots seven or eight persons in the course of solving the case and (d) possesses such amazing charm that all the women in the story go starry-eyed and weak-kneed when he sneers at them.

I can't understand this latter at all.

The things these detectives do. For instance they are always battling the forces of evil. Now this is a little innocuous in itself, even if it does distress Emily Post. But how do they get away with it?

David, clutching a little card, replied: "Well, mummy, I got weighed!"

have worked hard and built their homes there for a great many years, should they now be expected to give their home away?

If one has a home with a limited number of rooms, barely sufficient for their own family, can they be expected to turn out members of their own family in order to accommodate strangers who wish to make the house their home? Let us all be just and ascertain the facts.

In my opinion, the partitioning of Palestine is the most pathetic thing the world has ever known. Taking a country by war is heinous, but for strangers to partition another person's country is pathetic.

High Prairie, Alta. M. H. Z.

Brutal Beating

Editor, Bulletin.—What kind of laws have we got in this country which will permit a woman like Mrs. Conrad to go so free?

Why, people have been given after administering such a brutal beating to a poor defenseless baby?

If murder could not be proved against her, the bruised, bloody body of the baby was proof enough of the cowardly beating—and her own words—"I've killed him this time"—is enough proof that it was not the first such strapping the child received from such a callous, heartless woman.

Why, people have been given jail sentences and paid heavy fines for being cruel to animals and here is a woman who is allowed to go free.

Also her husband—in my belief he is equally to blame for this tragedy. Perhaps he wasn't home at the time of the last beating, but by his own words he was the one who let the children and he should have done something to stop it.

Let us continue to have cruel and unreasonable display of temper against defenseless children and let us continue to let a woman pick on someone who can fight back if the case of Mrs. Conrad is not given to children.

(Mrs. A. ARNDT)

Cocktail Bar

Editor, Bulletin.—As editor of the Yellowknife Blade and a resident of this community since its beginnings I wish to protest in your column against the unwarranted slurs cast upon our womanhood by the Rev. J. K. Allaby in his letter to you published in your issue of June 22nd.

Mr. Reg Hammond gave you an extremely fair picture of the tone of behavior in the Yellowknife Hotel. The Inzunza Hotel is a highly respectable, well-run and thoroughly up-to-date hotel and its existence so far the wilderness has aroused complimentary comments from visitors of all types.

And when the reverend here look upon it as a sort of center of activity for a hostelry of which the community may be proud... most of us do.

There is just one thing certain: bigots who see evil where none exists, so there are a few citizens who may, on occasion, indulge too frequently in liquor. We are fortunate in Yellowknife in that the majority are excellent normals.

The picture painted by the Rev. Allaby of "men and women (who) come from the cocktail bar at all hours and have to be practically carried into the waiting taxis" is, to put it mildly, grossly exaggerated.

And when the reverend gentleman states that he has seen "the carriages lined up outside the hotel while the motorists are having their cocktails at four," he is, using the word of guilty of gross misrepresentation.

In the course of my business I

Offers Formula For New Peace

Is it possible to come to terms with the Soviet Union under conditions which will make world recovery possible and guarantee the security of the U.S.S.R. and ourselves?

The outlook is dark; but if we believe that reason is not altogether lacking even in the fanatics who govern the Soviets, it is not hopeless. It is hopeless if we follow the advice of Henry Wallace, for what he is suggesting is to permanently deal to the world of "spheres of influence," with the Russians holding Eurasia. This would bring a crisis of immeasurable proportions. It would turn the world into two permanent armed camps.

There will be no recovery and, therefore, no peace and stability until the Soviet Union frees all Europe and retires to the Curzon line.

Is that impossible? If we assume that the Soviets believe the time is propitious for world domination, it is impossible. But Soviet politicians are no less opportunists than others, and the Soviet situation is not the best in the world. It is doubtful whether the stogie governments they have enthroned in their orbit are not liabilities rather than assets. And on this assumption we should, it seems to me, promote an integrated European policy which it would be hard for the Soviet Union to find moral or security reasons for refusing.

European Federation

I would summarize this policy under nine headlines:

1. Promote a confederation of Europe—political and economic—on the Swiss model, under which no state can dominate the others, and integrate the western zones of Germany into this confederation.

2. Put the ownership and control of the Ruhr Basin under this confederation, with equal German participation.

3. Accept from this confederation a proclamation of absolute neutrality as between the Soviet Union and the United States, with the prohibition of all external military alliances. Permit the

federation to arm, only within the framework of a general United Nations quota, with the general policy of non-alignment and non-interference. Offer the Soviet Union a pact of mutual aid if attacked. If this is refused or dishonored, any attack on Europe by the U.S.S.R. will be regarded by the U.S.A. as a casus belli.

4. Negotiate with Russia to remove her armies to the Curzon line, plenipotentiaries to be held in eastern Europe within six months under United Nations supervision on the question. Shall we join the Soviet Union, the European confederation, or be independent?

5. Demand that the Soviets revise and keep their pledge to Franklin D. Roosevelt to dissolve the Comintern, meaning the liquidation of influence or direction over non-Russian Communist parties. If this is refused or dishonored, declare the Communist party here to be illegal and encourage Europe to do the same.

6. Offer the Soviet Union for the purchase of consumers' goods. Offer the withdrawal of our troops from Europe when these agreements have been consummated.

7. Create a revolving fund of American and European capital for an African agricultural development and colonization plan to afford outlets for the landless peasants of Europe and for the colonizing and colonized areas of the new world and the British Commonwealth. Create pioneering education projects in Europe to train emigrants for both continents.

8. Maintain the world's premier air force and navy and a first-class professional army, but at all times press in the United Nations for controlled universal disarmament.

9. Reduce the tariffs of the United States to an absolute minimum. (Copyright by The Bell Syndicate Inc. and Kensington Bulletin.)

Still Things to Learn

Builders of roads in the United States, where there are the best highways and paving in the world, are invited to a great conference in Chicago from July 16 to July 24. Foreign engineers are also invited to attend.

This is an event that Edmonton's city engineer A. W. Haddow should not miss. For all the latest discoveries and inventions in road-building are to be summed up in a series of lectures by the most noted American experts.

For instance, one lecture will deal with the use of mechanical equipment in road-making. Another will deal with road improvement programs. Another will discuss the structural designs of roads and highways. Still another will give the

latest information on the construction and maintenance of roads.

The most striking feature of this conference, which is being held by the United States Public Roads Administration, is the admission inherent in it that there is still a great deal to learn about road-building.

The Americans have the finest roads on earth. But they acknowledge the fact that there is still a great many things they do not know.

That open-minded viewpoint is highly commendable.

And perhaps the most valuable thing the visiting engineers will get out of this conference is to absorb a little of that viewpoint.

By Harold L. Weir

Mystery Fiction Has Fallen To Lowest Ebb

As a confirmed devotee of that kind of fiction commonly called the "thriller," I wish to register a complaint about the way mystery stories have degenerated.

I am eating no asparagus, mind you, on the subtlety of the plots.

In marked contrast to a friend of mine who picks up a book, reads ten pages and says, "The pool marker did it," I am a thoroughgoing sucker for all kinds of fictional complexity.

You can shove a murderer right under my nose and unless he has blood on his hands or a large label on his lapel printed in clear block letters, I am likely to invite him home to dinner.

No case I assert that this peculiar kind of literature has lost its kick. It still puts me to sleep beautifully, or even at night I happily fall in blood for an hour or so before turning out the light.

I cannot complain, either, that the thriller has become too gory. For I count that day as lost indeed that does not yield me up at least four or five nice bodies in the course of my research.

Fictional Slumming

The crux of my resentment is the fact that so many of the current detective stories are just so much fictional slumming.

What I mean is that you no longer meet the better class of people when you do your daily delving in crime.

In the days of Lord Peter Wimsey, for instance, it was less a pleasure to get yourself bumped off if you were sure that you were bumping someone else.

And then, in those good old days, you were always stumbling over the blessed body of an earl or a duke. Perhaps it was a knight who had been spotted with

his own golden spurs or a duke cowed down by the family strawberry leaves.

A marquis, too, makes a very imposing corpse. Even a baronet has his points when he is laid out decorously, with his brains spattered in final dignity over a signed Chinese rug.

I have even derived considerable satisfaction from the reading of a senator, a common senator, snickered in an appropriate setting of decent luxury.

Earthbound Literature

But all that is changed today. I haven't read of an emaciated victim in months. Not one single butchered baron has crossed my path.

Smiles

Young David had returned home after spending his Saturday penny. His mother asked him what he had bought.

"No, they hadn't any."

"No, they hadn't any of that either."

"Well, what did you spend it on?" she persisted.

David, clutching a little card, replied: "Well, mummy, I got weighed!"

A little old lady in her seventies went to a doctor. She expounded all her ailments, real and imagined, but seemed most concerned about a recurring dream in which she was dilig-

entiously sound in itself, even if it does distress Emily Post. But how do they get away with it?

All the murders, nowadays, take place in Chicago alleys under most depressing circumstances. Somebody gets conked with a beer bottle or pushed under a train or knocked off with a common ordinary pistol.

How terribly vulgar!

What has happened to crime among the nobility?

Can it be that the underworld, realizing the plight of the peerage under a socialist government, has refrained from slaking titles persons on the general principle that it is not sporting to pot a

batting bird.

Whatever it is, I am getting darn good and tired of mixing up with effluvia in my literary circles.

It is showing up in my manners, too. The other day I actually caught myself blowing on my soup.

Hard-Boiled Detectives

But the real degeneracy of the mystery tale reveals itself in the kind of uncouth fellows who solve the crimes.

LOOKING BACKWARD

1888—60 Years Ago

Manitoba government has resolved to build the line between Winnipeg and Portage.

Lord Lansdowne and Lord Stanley, departing and arriving governor - generals, exchanged greetings from the decks of their vessels in the harbor of Noville.

Commission of the British Admiralty has sanctioned the sending out of a vessel to survey a route for the mail steamers and to lay a submarine cable between British Columbia and Alaska.

1908—40 Years Ago

Caladonian Society will hold a picnic at fair grounds on Dominion Day.

Society for the Prevention of Cruelty to Animals is petitioning the city council to have drinking fountains for horses and dogs placed at convenient locations along the street.

1918—30 Years Ago

London: Austria is believed to be on the brink of revolution.

Washington: People of the United States have been placed on a sugar ration of one and one-half pounds per day.

Department of Education is being urged to defer the resumption of high school classes until October, in order that students may help in the harvest.

London: Premier Lloyd George has appealed to the women in Great Britain to help with the harvest work.

1928—20 Years Ago

Lloydminster: By unanimous vote of the House of Commons, the operative Union of Canada decided the time has come to establish a new Canadian flag.

Hamilton: Edmonton's Commercial Grains arrived here for a battle with an Ontario all-star squad.

Houston, Texas: Nomination of Governor Al Smith for the presidency was assured, when the Ohio delegation swung to his support.

1938—10 Years Ago

Popular railway official, Charles S. Fyfe who has been C.P.R. passenger agent here since 1910, retired today.

Edmonton's population for 1938 is 58,887, an increase of 1,833 as compared to last year's figure of 57,054, according to Alex Templeton, assistant city clerk.

A sudden rain storm which deposited 43 inches of moisture in 24 hours, caused a great deal of flooded gutters and flooded many basements.

New York: A \$2,000,000 slander suit was filed against Fritz Kuhn, leader of the German-American League, by Emmanuel J. Jack, who said he was suing Kuhn for libel and "all members of the Jewish faith who may join with him as plaintiffs." Kuhn testified at a legislative investigation that "all Jews without exception are enemies of the United States."

Report of Prices Board Is Approved

Opposition Members Refrain From Criticism in House

By George Kitchen

OTTAWA, June 29.—(CP)—The recommendations of the prices committee—aimed directly at reducing the cost of living—bear the stamp of parliamentary approval today.

Whether this means the government will put them into effect remains a question for the future, but it is a matter of record that Health Minister Martin, the government spokesman, gave them a spirited defence before the Commons adopted them last night without even the formality of a recorded vote.

Closing a bitter two-day debate that blocked the prorogation drive, Martin challenged the Progressive Conservative Party to say which of the 14 recommendations it would oppose.

OPPOSITION SILENT

When the motion for adoption was called, none in the official opposition benches rose to record their dissatisfaction with the report, though many had belabored it during the debate. CCF and Social Credit members, some of whom were lukewarm towards the report, also remained seated.

The recommendations, which Progressive Conservative spokesmen charged had been drawn up by the government itself rather than the committee and thus represented an *ad hoc* government policy, were that the government "consider" these steps:

- 1.—Removal of last November's emergency excise taxes on "commodities in common use" and removal of the import ban on fruits and vegetables.
- 2.—Reimposition of individual price controls and revival of temporary subsidies where it was shown that hardship otherwise would result.
- 3.—Revision of rent control regulations to remove hardship in certain cases.
- 4.—Consideration of the Canadian supply situation and the interests of producers and consumers before removing export embargos on certain foods (apparently the embargo on the shipment of beef cattle to the United States).

The government already has indicated its adoption of another recommendation—that a commission continue the work of the committee after prorogation—by placing an appropriation for \$50,000 to cover this suggestion in its supplementary estimates.

With the prices debate ended, the chamber resumed study of revenue department estimates as the prorogation drive picked up fresh impetus. There was some hope, though none would make an outright prediction, that the session might be completed late tonight.

A blistering barrage of criticism came from the opposition benches before Mr. Martin, who had served as chairman of the all-party committee, closed the debate.

Bracken charged that the government itself had brought about the rise in prices through its policies of high taxation, expansion of credit and currency and improper decontrol.

Solon Low, Social Credit leader, said the cost of living could be reduced by 20 per cent in a period of months through a carefully-planned taxation reduction.

"Of course I hung up on him! THAT was the ring he said he was going to give me!"

Grasshoppers Appear In Southern Alberta

MEDICINE HAT, Alta., June 29.—(CP)—Grasshoppers have begun to appear on southern Alberta farms and the farmers, saying they are unable to cope with the minor plagues, have appealed to provincial and federal agriculture departments for help.

R. C. Black of Medicine Hat, named at a week-end meeting of district farmers, has asked the provincial government for immediate help, suggesting aerial spraying with insecticides.

The affected area is said an 80-mile stretch between Medicine Hat and Taber. Official checks 10 days ago revealed small areas of grasshopper destruction but farmers say that during the last four days "thousands of acres" have been attacked.

Barley, oats and wheat—particularly in the Bow Island section—are reported damaged.

At Medicine Hat a poison-mixing station is operating, but although poison stocks are sufficient there is a shortage of sawdust, the bulk ingredient, carloads of it have been asked from British Columbia. Other plants are producing the insecticide at Bow Island and Foremost, Alta.

Reports On Atomic Progress Made

WASHINGTON, June 29.—(CP)—Canadian and American progress reports in the development of atomic energy and other scientific efforts were discussed yesterday by Dr. O. M. Solandt of the Canadian defence research board and his opposite in the United States.

Dr. Solandt spent the day with Dr. Vannevar Bush of the United States defence department's joint research and development board, talking over questions of organizations.

They also discussed, a spokesman said, the function of their joint efforts within the military set-up. Much of their discussion had to do with secret activities.

Dr. Solandt is here by invitation of the research and development board and is returning a visit Dr. Bush made to Ottawa some time ago.

CANADIANS NOT BEING RECRUITED BY ISRAELI

VANCOUVER, June 29.—(CP)—The Israeli government is not recruiting Canadians to fight in Palestine, a director of the Zionist organization of Canada said yesterday.

"The idea that Israel is bidding fantastic prices for fighting men in Palestine is poppycock," said Director Harold A. Freeman, a Vancouver lawyer. He said Hagana, the Jewish army of 80,000 men, receives only subsistence pay. "Israel needs supplies of food and clothing more than she needs fighting men," he declared.

Two Injured In Crash Of Plane

CHILLIWACK, B.C., June 29.—(CP)—Two Chilliwack men were injured yesterday when the plane in which they were taking a pleasure flight flipped over on a Rose-dale farm.

Pilot Ken Inkster and passenger Archie Boule, both 21, are in hospital.

The pair was flying in a Fleet Canuck over a field where Boule's brother, Bob, was working on a tractor.

An eyewitness said the plane went into a steep bank, caught one wing on the field and crashed, narrowly missing the man on the ground.

Rosedale is 72 miles east of Vancouver.

Further Purchases

WASHINGTON, June 29.—(CP)—Further authorizations for purchases announced yesterday by the economic co-operation administration increased the total for Canada to \$142,000,000. Total authorizations to date amount to \$730,783,593.

Wife (inspecting new home): "How many closets are there, dear?"

Husband: "I've counted five."

"That isn't enough. You'll want one for your things, won't you?"

PAY YOUR SEN AND TAKE CHOICE

TOKYO, June 29.—(AP)—When an earthquake strikes Japan, readers of the Tokyo Press can pay their sen and take their choice of casualty figures.

Jiji Shimpō reported today that in the town of Komatsu, in the quake zone, there was one person dead.

Mainichi, in a competing edition, said casualties in the same city were 600 dead and injured.

as chairman of the all-party committee, closed the debate.

Bracken charged that the government itself had brought about the rise in prices through its policies of high taxation, expansion of credit and currency and improper decontrol.

Drought, Worms Hit Alaska Crops

ANCHORAGE, Alaska, June 29.—(AP)—A combination of drought and cutworms has caused a 50 per cent loss of garden crops in the Matanuska Valley, Manager Carl Rasmussen of the Farmers' Co-Operative Association, said yesterday.

The shortage of vegetables, he said, will require larger shipments from the States. The drought in this area has been the worst since 1931, with only 45 of an inch of rainfall recorded in Anchorage during April, May and thus far in June.

Rasmussen said the potato crop was undamaged and the grain and hay crops were normal.

He said farmers could replant other crops after July 1 when cutworms are in the cocoon stage, but that it would produce late crops.

FORGER COULDN'T WRITE—MUCH

LOS ANGELES, June 29.—(AP)—It's an old gag, but every now and then it works.

Enrico Ramo, charged with forging a government cheque, argued with United States commissioner Howard Calverley that he couldn't write, and therefore he couldn't be guilty of forgery.

Well, perhaps the law had picked the wrong man, mused Calverley, handing Ramo a release card to be signed.

With gusto, Ramo affixed his signature—then promptly went back to jail to await grand jury action.

Guilty Man Is Father Of Judge

Ontario Planning Air Reforestation

TORONTO, June 29.—(CP)—Even before greedy flames have been quieted in Ontario's wooded north, the lands department has announced a plan to re-seed devastated areas from the air.

A statement today said aerial seeding of trees, a new phase of forest conservation, will be tried this fall by the research division of the department.

Meanwhile, the weather office at Toronto said showers were expected during the night in the heavily-burned Mississauga and Chapeau areas and would continue tomorrow.

The man, who had pleaded guilty to the overtime parking charge, paid his fine and left the court. He was George F. Brooks—father of the judge.

DISTRICT NEWS IN BRIEF

Lutherans Build At Stony Plain

St. Matthew's Church Founder Conducts Cornerstone Service

STONY PLAIN, June 29.—An impressive service was conducted when Dr. E. Eberhardt, founder and organizer of St. Matthew's Lutheran Church here but now of Edmonton, performed the rite of cornerstone laying for the new church Sunday, June 27.

VIKING BUILDING CEMENT WALKS

VIKING, June 29.—Contractors are busy laying 25,000 feet of cement walks in the residential part of the town. Talk of a new fire station coupled with a small swimming pool for youngsters only is being mooted.

Leading Sudeten Goes to Hanover

DAWSON CREEK, B.C., June 29.—Mr. and Mrs. W. Wanka of the Tupper Creek Sudeten settlement embarked on the S.S. Aquitania for Southampton, Eng. June 25. Their destination is Hanover, Germany, where Mr. Wanka will resume his work for the Canadian Christian Council for Resettlement of Refugees.

Economics Class Gives Display

ATHABASCA, June 29.—Second annual Achievement Day of the Athabasca high school home economics class was held recently at the United Church auditorium. Representatives for the different classes were Lois Conquest, Dorcas Stark and Genevieve Sheweb. Speakers were N. M. Purvis, principal of the Athabasca school, W. E. Hodgson, inspector of the Athabasca school division; Mrs. C. L. Moore, home economics teacher; and Mr. Aldrich, pianist was Patricia Galloway.

Spirit River Club Staging Baby Show

SPIRIT RIVER, June 29.—Spirit River's Garden Club girls, who call themselves the "Picks and Snades" are now in full swing. Their gardens are not good yet because of the cutworms and lack of moisture.

Hospital Society Discusses Closing

DAWSON CREEK, B.C., June 29.—A special meeting of the Pouce Coupe Hospital Society, held recently, resulted in the calling of still another meeting as no decision was arrived at.

Sunday Schools Hold Joint Picnic

BAWLFE, June 29.—Annual Bawlf Sunday school picnic was held jointly with the Allied Sunday school, at the Allied school, June 29. A good attendance was recorded and enjoyable day spent.

HE WON'T HAVE MUCH TROUBLE ON VOTING DAY

BRADGATE, Ia., June 29.—FAP—An Iowa farmer has the name for all sorts of Republican political activity. His name is Dewey Warren Vote.

Rev. W. Randek, representing the Alberta-British Columbia district of the Lutheran Church, Missouri, was the guest speaker. Neighboring pastors and congregations also attended.

The new church, for which the foundations have been poured during the past few weeks, was designed by Col. J. N. Semmens, a Winnipeg architect, and its construction is under the supervision of L. Strass of Stony Plain, well-known builder in this community.

The building is of solid construction, consisting of a post and beam foundation with walls of local field stone trimmed with Manitoba Tyndall limestone. It is fireproof throughout.

The entire building project is under the direction of a building committee appointed by the congregation several years ago. The committee consists of T. Wudel, chairman; Rev. P. Janz, secretary; J. Mayer, G. Oppertshausen, J. Hennig and P. Janzen.

ORGANIZED IN 1894 St. Matthew's was organized Nov. 5, 1894. A combination church and parsonage was built that same fall, which became the first home of the Rev. Eberhardt. In the fall of 1908 the present church, located two miles to the southeast of Stony Plain was built and dedicated in May, 1909.

The present new church building is expected to be completed in time for dedication exactly 50 years from the time the first church was built in May, 1909.

Institute Honors Former Member

BERWYN, June 29.—Women's Institute of Berwyn entertained at the home of Mrs. Arthur Smith last Tuesday in honor of one of its members who is leaving to reside in Blueyue. The evening was spent in playing bridge with four tables in play. Honors for the evening went to Mrs. Charles Kay.

15-Year-Old Girl Stabbed, Uncle Takes Own Life

SWIFT CURRENT, Sask., June 29.—CP—A 15-year-old girl suffered abdominal injuries yesterday when her uncle attacked her with a jackknife and then shot himself fatally.

Police said the girl, Emma Yager, told them she was in bed at noon when Philip House, 50, entered her room, wounded her twice in the stomach and inflicted a deep knife wound on her hands, then rushed to the basement where he shot himself with a 22-calibre rifle.

Police said House had been in a melancholy state for the last year. The girl's condition was reported good.

Hospital Society Discusses Closing

DAWSON CREEK, B.C., June 29.—A special meeting of the Pouce Coupe Hospital Society, held recently, resulted in the calling of still another meeting as no decision was arrived at.

HE WON'T HAVE MUCH TROUBLE ON VOTING DAY

CARNIVAL

By Dick Turner

"How old am I? I'm six years old! How old are you?"

Berwyn Music Pupils Present Piano Recital

BERWYN, June 29.—A piano recital given by the pupils of Mrs. Dave Shaw, was presented to the public recently in the community hall. E. C. Searcy acted as chairman for the afternoon. At the conclusion of the program, Mr. Searcy expressed the audience's appreciation of the afternoon's entertainment.

Participants were Gail Smith, Jimmie Algar, Dorothy Yeld, Rickie Wynne, Yvonne Lingings, Ken Johnston, Audrey Harris, Joan McDonald, Arthur Wharton, Jackie Schur, Janet Frederickson, Adeline Webber, Elaine Warren, Ted Sorenson, Joyce Richards, Carol Donis, Joan Lingings, Mary-Lou Wharton, Margaret Algar, Catherine Close.

As an added attraction, the Berwyn singing award winners in the recent Peace River Music festival were featured. They included vocal duets by Elaine Shaw and Catherine Close, Gwen Gleason and Nellie Close, vocal solo by Nellie Close and Catherine Close.

As a token of their appreciation, Elaine Shaw, on behalf of the pupils, presented Mrs. Shaw with a beautiful flower vase.

Prisoners Released

HAIFA, June 29.—(Reuters)—The last 12 Jewish prisoners held by British military authorities in Palestine were released Monday within 48 hours of completion of the British evacuation.

Music Recital At Perintosh

PERINTOSH, June 29.—Fifth annual music recital of the students of Miss Nellie Lindgren, local music teacher, was held at the Church of God on June 25. Rev. John Therou presided. Rev. Victor A. Lindgren made the opening and closing prayers.

New Manager At Willingdon

WILLINGDON, June 29.—H. C. Reeves, manager of the Canadian Bank of Commerce, has been transferred to Staveland, Alberta. Before their departure, a farewell party was held in the Willingdon hall and Mr. and Mrs. Reeves were presented with a handsome coffee table in appreciation of their community work during the 3½ years they spent in Willingdon.

Mr. Reeves was president of the Willingdon Curling Club and Exalted Ruler of the Willingdon Elk Lodge. Mrs. Reeves was a member of the Willingdon Public Library Board and past regent of the Col. Reid Chapter, IOOE.

T. E. McPherson of Calgary has arrived to take Mr. Reeves' place in the bank here. He is accompanied by his wife and four children.

Farmers Worried By Dry Weather

VIKING, June 29.—Dry weather is worrying the farmers as well as businessmen. About one inch of rain has fallen in the district since May 1. Grain is expected in the shot blade by July 1 with very little straw as a result. Feed shortage is feared throughout this part of the province unless providential rains fall soon.

MOSQUITO PLAGUE WORST, SAYS RANGER

HIGH PRAIRIE, June 29.—Monte Elford, fire ranger for district 35 has returned from a trip of 160 miles south and reports the mosquitoes the worst he has ever seen in his many years of bush experience. Accompanied by Gordon Fowler, radio technician of Edmonton, the ranger escorted Towerman Andrew Craig to Goose Mountain to be radio operator for the season.

The Goose Mountain trip was made May 26 to June 8, and the travelers encountered soft footing at the West Prairie ford. All corduroy was washed from bridges, although stringers still remained, and high water had washed the East Prairie trail away in many places. Drifts of snow in the hills were still nine feet deep at that time.

At present Ranger Elford is under the care of the doctor, having suffered a severe cut in the arm with an axe while fighting a forest fire in the Metis area. The eleven men left on the fire are believed to have it well under control now.

Three Seamen Fined For Trespassing

THOROLD, Ont., June 29.—(CP)—Three seamen, members of the Canadian Seamen's Union, yesterday were ordered to pay fines and costs of \$11 each when they pleaded guilty to charges of trespassing on Welland Ship Canal property.

The three men, John D. Fets of Toronto, Gordon Middleton of Winnipeg, and Raymond J. Morriarty of Elora, Ont., were arrested Monday morning.

Permits Issued At Olds \$122,000

OLDS, June 29.—Approximately \$122,000 in building permits were issued at the meeting of the town council this week.

Among larger items were: New Bank of Montreal Building, \$50,000; Brody's Ltd. Store Bldg., \$22,000; new St. Stephens Catholic Church, \$22,000; R. E. Mayhew residence, \$8,500; Dr. Mitchell, \$3,500; W. Moritz, \$2,500.

"Utility" beef is just as high in nutritive value as are the top grades of beef.

Carry Travellers Cheques and you can't lose...

It's the safe way to carry travel funds. Here's why... Before your Travellers Cheques can be cashed, they must be signed twice by you: first, when you buy them and again when you cash them. So if lost, stolen or destroyed, and before you have added your second signature, they are worthless to anyone else... and you get your money back. Keep your travel funds safe. Carry Travellers Cheques on all vacation or business trips. Cash them wherever you go, as you need the money. Sold at all branches.

No Tuckers, No Dewhursts

Uh uh! The House of David team which dropped the duke to Kansas City Monarchs at Renfrew Park Monday can't be classed with a number which 'Doc' Tally shepherded this way prior to the war.

Admitted it's a sucker's trick to rate a team off one showing. But there don't appear to be any Tuckers or Fausta or Dewhursts on the current bearded roster.

The war called a halt to the activities of the Davids. Only last season they hit the road again after the layoff. Tally and Manager George Anderson still have a piece to go on their rebuilding job.

The 'pepper game' remains a superb hand-is-quicker-than-the-eye routine. It was easily the top contribution which the aggregation from Benton Harbor made to Monday's exhibition.

The homespun Tally was a little redneck when it was over.

"We're a far better club than that," he scolded. "Wait until the next game."

Tonight's the night.

Life Begins at 45

By contrast Monarchs went at a good lick all the way. They were strong defensively and not a one but seemed to be able to out-leg most of the opposition.

Manager Bell warned to his outfielding chores by expertly picking off a looper from the bat of Anderson in the third inning. In the sixth the 45-year-old ball hawk pulled off the catch of the local season by going miles to his right to track down Dick Wykoff's towering 420-foot shot near the wall.

Bell is unbelievably youthful looking for a man who says he's 45. But fans who thrilled to his great catch at Wykoff's expense won't much care how old he is.

We liked second-sacker George Handy best of the infielders. He's great on the front end of a double play, particularly. At first base a loosey-goosey colored boy called Merle Porter made things look easy.

He's good at getting that foot out of there . . . of 'cheating' a little on the close plays at the bag. Dan Wilson looked like he might go down to first faster than any of his mates.

A Bell for St. Louis

Practically all members of the Monarch cast have played with or against Jackie Robinson. As a group they're on the young side.

Bell's home is in St. Louis. This is his 28th season at the game. Looking at him brings home the realization that if and when the Negro makes it to the major leagues in any considerable numbers the average playing span under the big tent is going to be upped.

These boys won't be all through at 31 or 32 years of age.

There's no cockiness in the Monarch camp. But you can't blame them for liking their chances every time they swing into action against their victims of Monday.

However, one swallow doesn't make a summer. Neither should one shabby performance serve as a final yardstick in rating a ball club.

Maybe those Davids will bounce back tonight. After all a touring team likes to be able to book back into a town the following year.

Al Young Stops RCAF; Mortons Ignite in 5th

Al Young scattered eight hits to pace Legionnaires to a 9-2 triumph over RCAF Jets, and Mortons exploded for seven runs in the sixth inning to down South Side lassies 7-3 in a pair of Kingsway fastball offerings Monday night.

Legionnaires scored all their runs in three innings in the senior men's fixture. They went for three tallies in the second frame, five in the fourth and completed the rout by Ted Filipevic, RCAF moundman, with a singleton in the ninth.

Jack Davies packed a good-sized chunk of the winners' hickory power, belting two triples in three times up. Ross Macfiech also came up with a triple for the victors.

Tillie DeParrard whiffed seven South Siders while toiling on the mound for Mortons. The girls from across the river rained out a 3-0 margin by the fifth inning and 32:22 headed for a victory, until Mortons cut loose.

Then four South Side errors, a triple by Fran Gerbrandt, a double by Bonard Wright and a walk produced seven runs and victory for Mortons in the sixth.

Leg - Weary Robinson Retains Crown

CHICAGO, June 29.—(AP)—Leg-weary Ray (Sugar) Robinson, world welterweight champion, successfully defended his title Monday night by defeating Bernard Docusen, New Orleans challenger, in a blistering 15-round battle in Comiskey Park, home of Chicago's White Sox.

The decision of the two judges and referee, Walter Brightmore, was unanimous.

The 21-year-old challenger, never before floored in 60 bouts, gamely survived a nine-round knockdown in the 11th round.

STUDYING THE RECORDS of previous Alberta teams in the Willingdon Cup matches are three players who won positions on this season's aggregation. From the left: Jim Harper, junior representative, Burns Martell, Johnny Aitken and Bud Loftus.

Louis Favors Elimination Meet to Uncover Successor

NEW YORK, June 29.—(AP)—Joe Louis Monday called himself "an ex-boxer," suggested an elimination tournament to determine his successor, and declared he would make known his political stand after the Democratic Party convention in Philadelphia next month.

"But I definitely won't be for Wallace (Henry Wallace, leader of the third party) or any third party," the retired, undefeated heavyweight champion of the world added. Louis also denied reports he planned to run for congress.

The champ, Manager Marshall Miles, and several other members of the Louis party, visited the offices of the 26th Century Sporting Club to talk to promoter Mike Jacobs and his stand-in Sol Strauss.

In good spirits and looking very fit despite a slightly discolored left eye and a lump high on his left cheek, the champ joked with reporters and reiterated his decision to quit the ring.

Asked whether he still considered himself champion, Louis replied promptly "I don't consider myself a boxer any more."

A reporter pointed out to Louis that Joe Jeffries had named two fighters to meet for the championship when he retired as heavyweight king in 1905 and asked him if he felt he should do the same.

"No," he said slowly. "I don't think the winner of Jersey Joe Walcott-Gus Lesnevich fight should be named champion. An elimination tourney is the only way to do it. I think they ought to take the 10 top-rated fighters and have them fight it out."

Just as the interview was ending and Louis was about to get up from his chair, Strauss hurried in, convinced Louis and said: "You're still the champ."

KEN WATSON BEATEN AT NELSON BONSPIEL

NELSON, B.C., June 29.—(CP)—First surprise of the fourth annual mid-summer bonspiel was the defeat Monday of Ken Watson, renowned Winnipeg curler.

In a close match, he lost to E. O. Parry of Morris, Alta., 8-4.

Thespiel opened Monday with five provinces represented—26 rinks from British Columbia, 22 from Alberta, 21 from Saskatchewan, three from Manitoba and two from Ontario, J. Taylor of Portage, Wis., was the lone United States entrant.

Théo (Frenchy) D'Amour of Trail, Canada's curling champion, opened play, extending an official welcome to the visitors.

With ice holding up well in both curling and skating Among outside first round winners were Marshall Leas of Red Deer, who beat J. Bentley of Delisle, Sask., 13-6 and E. C. Thode of Saskatoon who beat H. M. Whimster of Nelson, 11-9.

ing low blows in the second and the ninth was taken away from him because of another barrage that landed in the territory.

Docusen, heretofore beaten only twice, traded punches with the champion and stayed on top of him until the 10th. Then he lost ground in a furious exchange which ended with Docusen's right hand punching Robinson's head.

Robinson was punching desperately to the body and head, with the "hook" failing to make a return.

Robinson opened the 11th round with a vicious attack which drove Docusen into the ropes. He was unable to lash back at the champion but suddenly managed to wriggle off

the ropes and into mid-ring. Then Robinson let fly with a left hook to the chin that dropped Docusen heavily. He lay motionless for seconds, then doggedly tried to struggle to his feet. He got up at the count of nine and collided with another volley, but Robinson was so leg heavy from the flurry he was unable to finish him.

To the surprise of the spectators, Docusen quickly lashed back at Robinson and fought him to a standstill until the bell.

EDMONTON BULLETIN, Tuesday, June 29, 1948

Wind Kites Scores As Golf Team Named

Barr, Loftus, Martell And Aitken to Go East

A junior and three veterans of the fairways will carry the Alberta banner in the Willingdon Cup matches in Hamilton early next month.

The junior is Buddy Loftus, who led the pack home with a fifty 301 in the 72-hole medal test at the tough Mayfair course, and the veterans are Burns Martell, Duane Barr and Johnny Aitken.

A stiff, tricky wind played havoc with the shots and holes during the day, one of the fiercest in the first few holes of Monday's play.

Loftus had his game under control all the way to post a pair of 74's for his 201 total. Johnny Aitken had a consistent 77-75 tally for 302 and Burns Martell was 78-74 from tee to green, but had his troubles on the carpet. He posted 79 and 80 for 305.

Ken Jennings wound up with a 312 total to hold down the next berth, seven strokes back of the last team member.

Duane Barr, member of the Earl Grey course in Calgary, earned his spot on the team by winning the provincial amateur tourney here Sunday.

Burns, runner-up in the provincial amateur, three-paired six greens during the day, one on the first 18 and five the second. On the 13th in the afternoon he hooked a foot putt and the lip of the hole. Considered one of the best putters in the province, Martell will probably be back in top form with his obstinate green club before the team boards the train for the east.

Enthusiasm was high at the first tee Monday morning—everyone had visions of hoarding the golf clubhouse—and that's probably why the golf was of a mediocre variety.

Johnny MacDonald was one of those who had such a vision—but he was gazing into the wrong crystal ball. It didn't take Johnny, starchy Country Club player, long to find his mistake.

On the very first hole a conglomeration of things happened and Johnny had had it, but definitely he whammed his second shot over the top form with his obstinate green club before the team boards the train for the east.

Enthusiasm was high at the first tee Monday morning—everyone had visions of hoarding the golf clubhouse—and that's probably why the golf was of a mediocre variety.

Chapman Sparkles In Jewellers' Win

Sparked by sharp fencing and home-run clouting of Ron Chapman, Northern Alberta Jewellers' Association downed Unemployment Insurance Commission 3-0 in Intermediate C football at south Kingsway Monday night.

Chapman smacked the lone homer to start a six-run, Jeweller's attack in the fifth inning. Bill Parker and J. Evans hit three-baggers for the victors.

Empire Title Bout Still a Possibility

TORONTO, June 29.—(CP)—Toronto's Arthur King may fight England's Billy Thompson in London, England, July 26 for the British Empire lightweight title.

Manager, Huntman, Thompson's offered King's manager the English bout which would replace a match which had been scheduled for Toronto Tuesday night but was cancelled during the week-end after disagreement over officials.

A decision concerning the English fight is expected Tuesday.

Huntman also said Toronto promoter Frank Tunney Monday offered to stage the fight here July 4 with an American official as referee. But Thompson was already in New York, bound for England.

Truck Accident Inquest Adjourned

CALGARY, June 29.—(CP)—Inquest into the death of Andrew Anderson of Husar, Alta., was adjourned indefinitely yesterday after a coroner's jury viewed the body.

Mr. Anderson died as a result of injuries suffered in a truck collision near Chancellor, Alta., Friday.

Baptists Seek Measures Against Racial Prejudice

AUTOISTS NOTE: METERS ENROUTE

Two car loads of parking meters have been shipped from the Meter Co. plant in Montreal, chief officials learn today.

They were also informed that an expert had left for Edmonton to install the meters.

The installation of 354 meters in the downtown section of the city, in three last week blocks in White Avenue.

It is expected that work on the downtown blocks, to carry the meters, will start in the near future.

All People Should Get Franchise, Is Contention

The Baptist Union of Western Canada called upon the Dominion and provincial governments Monday to take measures against racial discrimination. The plea was contained in a resolution passed at a resolution, which was passed unanimously at a Union meeting here.

Two requests made in the resolution, which was one of several considered on the final day of the Baptist convention were:

"Resolved, that the provincial and Dominion governments be requested to expedite the granting of the franchise to all people regardless of race, who give proof of their ability, and desire to become good citizens of Canada, to forbid by law any discriminatory advertisement with respect to race."

"Resolved, that the provincial and Dominion governments be requested to expedite the granting of the franchise to all people regardless of race, who give proof of their ability, and desire to become good citizens of Canada, to forbid by law any discriminatory advertisement with respect to race."

"Resolved, that the provincial and Dominion governments be requested to expedite the granting of the franchise to all people regardless of race, who give proof of their ability, and desire to become good citizens of Canada, to forbid by law any discriminatory advertisement with respect to race."

"Resolved, that the provincial and Dominion governments be requested to expedite the granting of the franchise to all people regardless of race, who give proof of their ability, and desire to become good citizens of Canada, to forbid by law any discriminatory advertisement with respect to race."

ANIMAL CRUELTY LEADS TO FINE

John Golemsky, St. Albert, was fined \$50 and costs on three counts for Monday on a cruelty to animals charge.

According to Alex Lawrence, city manager of St. Albert, Golemsky had a horse at 112 Avenue and St. Albert Trail, June 18.

Lawrence told the court that he found the horse with a sack over its head and a wire set in its mouth.

When asked for an explanation by Magistrate Miller, Golemsky replied that he had thought the horse was vicious.

Hallum Gets Grit Nomination

James Hallum, 42-year-old Sedge-wick farmer, was named Liberal candidate in the provincial election for the Sedge-wick constituency at a convention held in Killam.

Three other possible candidates contested the nomination. They were John Galt of Killam, Jack M. Head of Sedge-wick, and L. P. Steward of Killam.

Sixty delegates were registered at the convention.

On Wednesday J. Cranmer, Mill-kill farmer, was named by Hand Hills constituency Liberals as their provincial candidate. There were 75 delegates at the Hand Hills convention in Hand Hills.

P. Fain of Hand Hills was the only other hopeful seeking the nomination in that riding.

SCHOOL DAYS ARE OVER

For this happy-faced group of youngsters from Delton school, Monday night youngsters, the grade six at Delton, were presented with crests by Principal Kulak, on behalf of New Delton

NEW STATION OPEN SEPT. 8

Official speaking of the CBC's new 50 kilowatt radio station in Alberta, CJS, has been postponed until September 8.

The station, which will be opened on September 8, is also to be opened until September 8.

It is expected to open these days early in July but the delay was necessary to get the complicated high power equipment of new design, fully adjusted and tested.

The station will also have higher power transmitters at Toronto, Ontario, and Chicago, Illinois, about September 8.

Veterans Name Dominion Delegates

Edmonton delegates will attend the annual convention of the Army and Navy Veterans Association in Victoria, B.C., July 1 and 2.

They are: President, J. H. Lynch, president; A. D. Stewart, secretary; L. D. Campbell, treasurer; and J. H. Lynch, president.

Another representative, Thomas Hollands, will attend as an advisor.

22 More Homes Slated For City

Building permits totaling \$150,000 were issued at the week end for construction of 22 homes here.

Steve Hryca, 298 Union building, took out permits for 17 homes. Total of the permits was \$115,000.

The houses will be erected in the 112 and 114th streets.

Five permits were issued to G. A. Larson, 101 1/2 street, for the erection of houses on the 110 block on 132 street.

Two permits were issued to G. A. Larson, 101 1/2 street, for the erection of houses on the 110 block on 132 street.

New Gold Mining Method May Change Development

Exploitation of high grade ore outcroppings in the Yellowknife mining area, by utilization of small capacity outcrop methods.

The first company operating in the north to carry on development of these outcroppings as a means of financing the total development of the area is the Yellowknife Mines Ltd.

The company owns 15 claims, approximately 750 acres, on the north shore of Gordon Lake, 50 miles northeast of Yellowknife. The property was discovered by Gordon Wainwright and Jack Wainwright in the fall of 1936, and on April 15 this year was purchased by the West Bay company.

Following the discovery in 1936, the company developed a small mine in the area, and a large claim staking followed.

The company was immediately made to stop a claim on the Gordon Lake property. Thirty tons of machinery were ferried to the claims by Canadian Pacific Airways.

This equipment was landed at the mine site on May 8, and on June 22 the first gold brick from the claim outcroppings was poured at a ceremony attended by company officials from Toronto and Edmonton.

The property is in production with an expenditure of \$30,000, and James McAvoy, of Edmonton, manager of the property, expects that recovery from the high grade ore veins will run from \$1,500 to \$2,500 daily.

He said his mining operations were not the conventional method of bringing a mine into production, but it has proved so successful that plans are now made to increase the plant capacity as the ore situation unfolds.

Funeral Today For Oilman

Funeral services will be held at 2 p.m. today for W. A. Simpson, 111 street, who died Saturday after a long illness.

Mr. Simpson was well known as an oilman who came to Edmonton in 1910 and was transferred to Edmonton in 1921.

He was a member of the First World War, and a member of the Masonic lodge.

Last rites will be given at Hainstock Funeral Chapel and burial will be in Edmonton cemetery.

City Student Wins Fellowship

Joan Fraser, 1614 100 Avenue, 1947 graduate from the University of Alberta, has been awarded a Cumulative Fellowship at Trinity College, University of Toronto.

She will begin study there in September, and will teach in the High School, affiliated with Trinity.

For the past year, Miss Fraser has been instructing the English language at L'Ecole Normale d'Instituteurs in Grenoble, France.

She is expected to visit in Edmonton on her return from Europe before taking up her new post.

YMCA Camp Opens July 3

Three YMCA boys' camps will be held at Camp Kee-Way-Dhin this summer starting July 3, according to W. Armour Bull, camp director.

The camps, each of two weeks duration, are being sponsored by the Y's Men's Club of Edmonton.

Camp Kee-Way-Dhin, 21 acres in area, is located on Lake Watkinson, several miles from St. Albert. It is equipped with a large dining hall and kitchen. An auditorium is to be added.

About 125 boys can be accommodated in cabins and tents erected over raised platforms.

Program for the two-week camps is varied and designed for the physical, mental and social development of the boys.

The camps are available for all boys of the Edmonton district. Transportation to the camp is provided.

During his visit to the north, Major-General Penhale will also inspect the station of the Royal Canadian Corps of Signals at Yellowknife, one of the largest stations in the system. He also plans to view the Slave River power project.

Major-General Penhale and Lt.-Col. Gen. G. S. Macdonald will return to Edmonton Thursday.

Medicine Hat Man Takes Over Post With CPR Here

Clarence Jackson, chief clerk in the Canadian Pacific Railway has been transferred to Edmonton, it was announced today.

He will take over the duties of F. E. Scott, 21 Avenue, who is leaving for the CPR operating department here.

Mr. Scott, who has been with the CPR since 1921, will be replaced by Mr. Jackson, who has been with the CPR since 1921.

Mr. Jackson, who has been with the CPR since 1921, will be replaced by Mr. Scott, who has been with the CPR since 1921.

Oriental Beauty Spots Described to Kiwanis

The Orient will make one of the latest tourist spots in the world, according to a report made by members of the Kiwanis Club at its meeting in the Macdonald hotel.

Col. Hancock recently returned from a six weeks, 6,000-mile tour of Japan, China and the Philippines. He is assistant vice-president of the Orient region for Northwest.

In the Orient, he said, the tourist is always encountering something new, strange and different. These countries and the transportation companies, he added, are even making plans to handle a large tourist demand.

Gen. Douglas MacArthur and the U.S. Army in Japan are doing a creditable job in handling post-war conditions in Japan, he

THEY'RE ON THE AIR... this trio of local radio artists, seen in action in spacious, sound-proof and most modern main studio of the new CKUA-FM radio station.

FM Inauguration Offers City Folk Radio's Finest

By Tommy Graham

With the opening Monday evening of the new CKUA studios, Edmonton and district listeners will have the benefit of the most modern radio facilities to bring them local and network broadcasts.

Introduction of FM (frequency modulation) in itself is an outstanding contribution to the development of radio in this area, and special tribute should be paid the government-sponsored radio station CKUA.

Hon. D. B. MacMillan, minister of public works, officially opened the new studios, situated on the third floor of the Provincial building, when he "threw" the FM switch following a short address, thus marking the opening of the first FM station in western Canada, between Winnipeg and Vancouver.

Walker Blake, manager of the government-owned station, and

feed the CBC a program broadcast locally, recording another program, and rehearsing the month without any interference with the other.

The new equipment, which will eliminate all static, both natural and man-made, is the most modern FM apparatus available.

In addition to being equipped with the latest in FM and other radio apparatus, the studios are the most modern in western Canada.

They are streamlined in design and construction, and feature the most modern fixtures and installations.

STAFF MEMBERS

In addition to the station manager, Walker Blake, radio station CKUA is staffed by: program director James MacInnes; chief engineer Roy Usher; chief announcer, Robert Wilson; announcers, Donald McDonald, Steve Woodman and Reginald Shawcross; technicians, Stan Mitchell, William Panko and Gene Dalgleish; recorder Norman Blamire; control operator Alex Rankin; continuity editor, John Langdon; sports editor and announcer, Art Ward; and receptionist and stenographer Florence Hodgson and Margaret Moghan.

Transmission System For Network Broadcasts Unique

Network broadcasts heard daily over CKUA reach Edmonton via a transmission system unique in the annals of radio.

It is a system in which service to the listener in his or her home is paramount over all other considerations.

RESOURCES POOLED

It is a system in which there is no competition between companies whose lines are used. The companies pool their resources without question to make network programs available to all.

Since radio is now a part of daily

life in nearly every home, a break in other communications does not immediately effect as many as are effected when a network announcer says casually, "Due to reasons beyond our control, this program has been interrupted."

But just such an interruption transforms the usual quiet of central transmission point to a wild

scramble to locate the break and its cause. Within minutes listeners will hurry to the trouble spot, even a walk from the post from a railway yard to take equipment to the job. Meanwhile, technicians have rerouted the broadcast and the program is returned to hundreds of thousands of homes.

Better Listening Now a Reality

Frequency Modulation Wipes Out Interference

It's FM... the newest in radio. Now added to the wonder-world of electronics is a new form of broadcasting program service, commonly called Frequency Modulation... "FM" for short.

By this new method of sending words through the air a bright and new facet, a new highlight... is added to the science of broadcasting. Sparkling music faithfully reproduced speech, correct pitch and timbre; and unannounced sound effects; the special characteristics of every instrument in a great symphony; or the little "ah" of a child's voice... all these are brought to you by FM. It is re-created as originally produced.

Moreover, this comes to you upon a background of deep silence because static and other atmospheric electrical disturbances, of the types that sometimes mar radio and broadcast reception are not heard.

TRUE TO LIFE
FM is so true to life you'll feel you are actually in the studio, and gives you two to three times the range of tone you get now from standard AM broadcasting. When the familiar type of broadcasting station is "on the air" an electrical wave is spreading out from its antenna.

And a "direct wave" is also travelling outward. These waves are called "carriers". The top, or "sky wave," goes up until it strikes the "ionosphere," a layer of ionized gas many miles up in the sky from which it is reflected down to your antenna. The reflection is most noticeable at night and is a characteristic of stations operating in the standard broadcast band.

In FM transmission—due to high frequencies used—no waves are reflected from the ionosphere. And static radio receives only a direct wave with no "reflections". The FM receiver also rejects other waves from other stations—accepts only those from the station to which it is tuned. The difference between AM and FM lies in the way the sound waves are reflected to compensate for their varying intensities.

SAME TIMING
In AM waves the force (or amplitude) of the waves is regulated and the sound waves have of irregular height, but have the same timing between each wave. In FM the timing (or frequency) of each wave is regulated and there is a difference in the length of time between each wave... but the force, or power, of each wave is identical.

It is this latter technique which makes possible the great new achievement in listening pleasure found in FM. FM eliminates static and keeps it perfectly natural. Natural static cannot penetrate the FM sound wave... it is skimmed off and rejected by the FM receiver. Even the static created by electrical equipment is discarded by FM and, to make clarity and unmarred reception doubly certain, there is a filter in your FM receiver that gives you the crisp, clear, high-octave delivery of the radio program you want to hear.

MORE TONE
These FM waves, that hold out the static, also give you far more fidelity up to 15,000 cycles than most

WALKER BLAKE
... The Manager.

Radio Technicians Probe Air Waves

Edmonton was among the first cities in Canada to organize its radio technicians for a planned investigation into the problems of air waves.

Due to the united efforts of our radio technicians, commercial stations in the city are now able to broadcast without interference from other stations.

At a more and more FM stations are on the air, programs in general variety will be available to owners of FM receivers.

The areas covered by FM stations extend slightly beyond the horizon, as seen from the top of the antenna. In most cases, such coverage will blanket an entire metropolitan or marketing area of several thousand square miles.

NO INTERFERENCE
Since this coverage is well-defined, other stations using the same frequencies may be located relative to nearby and still no interference will result.

Because of this lack of interference between stations, it is possible for several thousand separate stations to broadcast on the same frequencies.

These waves continually add and subtract from each other, creating a rise and fall in volume you know as fading. But in FM, the sky waves are shot off into space and don't bounce back. Thus your receiver picks up only direct waves and your program stays on the program you select.

FM has revolutionized radio and created better listening. Few Important People By-Passed. People are important and some important people are bypassed by most of the radio today. The glitter of big time, the thrill of the theatre, and the privilege of having close contact with the world's great personalities has not been denied to radio listeners.

It has been a policy to give the public what it wants and that policy has been continually enhanced by the development and extension of local radio facilities, which can rate with the best.

Westinghouse Gadget Simplifies Conversion

Another new development in radio is the Westinghouse frequency modulation converter, which may be attached to practically all AM radios to bring in new FM programs.

Smaller than an ordinary "personal" radio set, the FM converter embraces the complete tuning range of 88 to 108 megacycles.

It may be plugged into the photograph jack of your present radio set, thus turning it into the most modern of radio instruments.

The converter is complete with improved Stratavision, dipole antenna for the finest FM reception. With the increase of FM broadcasts, this compact inexpensive converter becomes a vital necessity in homes where a complete FM receiver is not at present a possibility.

This converter is featured and obtainable at local Westinghouse dealers.

Twenty Believed Drowned in Ecuador

GUAYAQUIL, Ecuador, June 29.—(AP)—About 20 persons were believed to have drowned Sunday night when a motor launch bound for Guayaquil sank on the Iloa de Cacha river. They were among 400 of them sleeping at the time, about the craft.

Ancient Egyptians are said to have performed amputations and various operations on the eye.

Ancient Greek and Roman sculptors produced many masterpieces in terra-cotta, or burnt clay.

F.M. is here!

We know you've waited a long time for this news. And we're glad to be able to tell you that you can now hear Frequency Modulation right in your own home at surprisingly little cost. The Westinghouse FM Converter can be connected to your present radio if you have a "phone" position switch.

STRIKINGLY STYLED IN RICH WALNUT WITH CURVED AND FLUTED CORNERS

Frequency Modulation means: Musical programs in their complete range of sound, including the "highs" you've been missing, against a "background of silence." It is not affected by outside interference. No hum or whistle.

Studio System Is Art, Science

Commercial radio broadcasting has been in existence for more than 25 years and it has been a period filled with amazing discoveries in the evolution and harnessing of the air waves.

CKUA studio system, and the routine of work which goes into all the exacting phases of building an idea into a radio program has become an art and a science requiring trained and efficient personnel.

While CKUA doesn't hold a commercial license, it nevertheless maps its programs along the same lines as radio stations having one.

A visit to the studios can see this teamwork of play. The business or executive offices, through which all the studio activities are cleared, is the nucleus of CKUA but the control room, news room, library, studios, etc., are each a nerve centre of a living system.

A studio visitor watching the various programs concentrates on the precision timing of each cue. Seldom does it occur to him that hundreds of things could go wrong between the typing of the script and the appearance of the announcer or artists at the microphone.

Accuracy and team play are the important factors of radio broadcasting.

The Italians used playing cards for magic tricks, as early as the 13th century.

You've Waited for FM Now It's HERE!

CKUA-FM gives you FREQUENCY MODULATION right in your own home. The new WESTINGHOUSE FM converter provides this new revelation at very little cost... and it can be connected to your present radio if you have a "phone" position switch. Then all you do is tune in to CKUA-FM... to enjoy radio programs as you've never heard them before.

Power Behind Radio 'Mike'

The power behind the "microphone" is the radio operator. At the master desk in the studio the operator has his own indicator. A sign of a dial stabilizes the transmission of voice or music fluctuations.

Radio is complicated, and like a naughty child needs watching at all times.

When they did for a favorite program and it comes in, right on time, the listener has a feeling that's the way it should be.

That's the way it usually is, too, but the men in the transmission studios, and the technicians in the control rooms, who realize the fallibility of electronics, are constantly aware of the things that might go wrong to delay a program 15 or 20 seconds.

Take the five kilowatt amplifier tube. It is a sensitive radio component which has very little "margin" in which it's necessary to the amplification of the station's transmitter. Every grid, every screen, every inflexible hairlike wire within its sensitive frame is vital. Nothing must go wrong here.

Neither should anything go wrong in the cabinet containing CKUA's FM transmitter and the revolutionary precision tube. There is a labyrinth of mysterious radio units about which the technicians must know everything.

There are meters everywhere in the transmission station. If one should vary, the technician must know why, and how to regulate it.

At the master desk in the studio the operator has his own indicator. A sign of a dial stabilizes the transmission of voice or music fluctuations. Radio is complicated, and like a naughty child needs watching at all times.

Sound Effects Play Big Part

Sound effects play an important part in radio.

Sitting before a turntable upon which the sound effect disc is revolving, the radio sound effect operator watches the program script and waits for the cue for a sudden electric storm, the screeching tires of a speeding automobile, the bark of a dog, or a baby's cry.

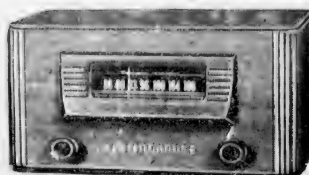

But behind this apparently simple procedure is the complicated technical system of the entire studio. Whether the disc operator is providing sound effects, "canned" commercials, or the late-night music, the cueing of the operation goes back deep into the entrails of the console and the recording apparatus.

Superior input circuits are required to make the sounds from the microphones suitable for transmission. CKUA has such consoles serving as units for control and monitoring of programs which originate at the microphone or in the transcription studio.

Eighty-five per cent of the recording in a radio station is of the transcription type.

Government Station Has Lengthy Range

A study of the towering steel masts at CKUA's transmitting station, situated on the outskirts of the city along the Calgary trail, does not give the full story of the transmission of programs to its listeners.

Old-fashioned broadcasting was entirely a matter of one or more lofty masts, supporting a network of horizontal wires, and not much importance was attached to what went on in the ground, and in the immediate vicinity of the antenna system.

But that is a matter of past history. Today radio engineers know that much of the energy which should have been radiated to the listener's radio receiver was dissipated in the form of heat losses in the ground, beneath those old antenna masts.

MILES OF WIRE
In the case of CKUA, there are several miles of fine copper wire, some buried about the thick base of the antenna masts, some on the ground, and some in the air.

There are more than 100 strips of wire, each about 1/2 inch wide, and each about 1/2 inch thick, of the copper ground array, stretched out in a grid pattern, and each approximately six inches long. Laying this network would have been a tedious job, with men digging trenches, and then laying the wire, and pulling the dirt back into place.

But modern engineering has a piece of equipment designed for this particular task. The wire is fed through the nose of a special device, which follows the trench, lays the wire, and pulls the dirt back into place.

The underground wire system

Deaths Yesterday

By The Canadian Press
KENTVILLE, N.S.—Dr. John Wilcox Bartlett, 76, former president of the Maritime Conference of the United Church of Canada.

OTTAWA—John Peter Turner, 67, Royal Canadian Mounted Police historian.

JERSEY CITY, N.J.—Dr. Bertold S. Pollak, 75, internationally known tuberculosis expert.

TORONTO—Leah Mathews, 70, widow of Lt. Col. J.E. Calvert, and long active as an officer in the Salvation Army.

has a specific part in the function of the entire antenna array.

In order to send out signals with a minimum of loss, the surface of the ground around the towers must be a perfect electrical conductor.

Ordinary earth does not nearly meet this requirement, but by laying the wires beneath the surface, the required conductor, and increased efficiency in radiation of signals is achieved.

At the CKUA transmitter, the ground system is designed so that loss of energy is kept to a minimum. Without these wires much electrical energy would be dissipated, resulting in a reduction of signal strength and thus the range of the station would be decreased.

CKUA, being on a low signal band, has one of the longest ranges in the area.

Transcriptions Big Boon Here To Radio Advances

Special events in radio have produced the big boom in the use of transcriptions of important happenings.

Whether it be spring floods, sporting events or other outstanding attractions or disaster, radio must be on the scene to give listeners a first hand account of what's going on.

This type of program is becoming more essential because of the increase of public events of unusual importance.

Radio is constantly proving its value by arranging its program with the use of recordings so that events which conflict on the layman's timetable can all be heard beside the live action.

Special events do not always include famous people, but people of some kind are always involved, in circumstances of fun, education or tragedy.

Tragedy or sport, the theatre or addresses, public ceremonies, the open road and the people on it, all come under the special events category and are broadcast in the interest of the public.

Special events are people and what they do, their struggle, their existence and the method in which they live.

The advancement of radio has made possible for the people to sit at home and hear the news of the world.

Subsidies For Gold Output Announced
OTTAWA, June 29 (C.P.)—Government subsidies for increased gold production were announced today by the Minister of Finance, James D. Macpherson, in a statement in the House of Commons.

The subsidies will apply to gold produced in Canadian mines.

EDMONTON BULLETIN, Tuesday, June 29, 1948 17

CKUA Equipped For On-the-Scene Reports

Via remote control. Radio station CKUA is fully equipped for providing its wide listening public with on-the-scene broadcasts whether it be through the medium of transmission via telephone, "long distance" wires or through their powerful recording equipment.

Although few people realize it, telephone lines carry most of the broadcasts originating outside the studio, either in the studio or direct to the transmitter.

If a broadcast originates from the CKUA studios, it is carried by ordinary telephone line before it is broadcast for about 15 miles through the air where it can be hooked up to a

loud-speaker and recorded or broadcast direct.

Long distance telephone circuits also carry broadcasts from the point of origin to the studio in Edmonton.

When we speak of on-the-scene reports, we are actually referring to a sort of high quality long-distance, telephone line linking a number of broadcasting stations.

For example, the network of the National Broadcasting Company extends from Montreal to Miami and from New York to San Francisco. One NBC program may travel as much as 3,000 miles, by telephone line, before it is broadcast.

FM in a Mantel Radio

With this beautiful AM-FM mantel model #7214, Stromberg-Carlson brings you FM in the low-price field. Now you can listen in on the standard broadcast band... and switch to FM with the touch of a button for superlative listening pleasure.

Here is total dandy that FM alone provides. Close your eyes... Against a background of silence the new FM gives crystal clear reception that ordinary standard reception lacks. FM virtually eliminates static and is unaffected by interference created by electrical storms and bad weather.

Now you can enjoy FM at its best in the low-price field with this beautiful Stromberg-Carlson Model #7214.

Each \$131.00

Available on the Convenient 4-Part Payment Plan.

Stromberg-Carlson Group Pioneered FM Development

By Major Edwin H. Armstrong
Inventor of Frequency Modulation

CKUA is to be congratulated on its inaugural frequency modulation broadcast, which marks the beginning of a new era in radio listening for the people of Edmonton and vicinity.

When the chapter on the development of frequency modulation is written in radio history, those who have pioneered the development will be proud to look back at the record of their work.

CKUA will have introduced to the listening audience of north-west Alberta, but none can be prouder of their part in the research and progress of FM than the Stromberg-Carlson Company.

BEGAN IN 1923

While research and study of frequency modulation commenced in 1923, back in 1930 the Stromberg-Carlson company committed itself to the large-scale production of FM receivers, and in so doing, exposed itself to the risks which the pioneer must always take.

No one could then foresee the manufacturing difficulties, the merchandising problems, the shortage of materials, plus all the uncertainties brought about by the action of regulatory bodies, to say nothing of the advent of the Second World War.

In spite of all these difficulties, Stromberg-Carlson never lost its faith in the future of frequency modulation, and today the public and the Stromberg-Carlson reap the benefits of its judgment.

CKUA's inaugural frequency modulation broadcast is the first step of advancement in FM in this area. We are confident that others will follow down the path blazed here Monday evening. But one thing is certain: Nothing can stop Frequency Modulation now.

Many Men, Women Behind the Scenes

Working industriously in the radio stations where your favorite programs originate, are many technicians and other people whose voices you never hear on the radio.

They are the men and women behind the scenes.

Yet, even with all the electronic equipment of modern times, there could be no listening pleasure without them.

They all have a part to play in the specialized organization of radio. Like the components parts of a newspaper, an army or a football team, they make up the framework of the final effort. Nothing could work smoothly without the co-operation and team-work of these essential persons.

A Civic Appreciation!

Edmonton, Alberta.

OFFICE OF THE MAYOR

June 28th, 1948.

TO THE CITIZENS OF EDMONTON:

I know that every citizen of Edmonton will join with me today in extending very sincere congratulations to Radio Station CKUA on the occasion of the formal opening of its new studios in the Provincial Building and on the inception of Frequency Modulation service.

As a city, we are most fortunate to have a radio station of the calibre of CKUA serving the community. In many ways, we take this service for granted. In fact, radio has become so much a part of our daily lives that few of us stop to consider the many benefits derived from it, especially when those responsible for station management have a deep sense of community responsibility.

In extending, on behalf of the Council of the Corporation of the City of Edmonton, very sincere congratulations to Radio Station CKUA today, I desire to take this opportunity of adding a heartfelt "THANK YOU" for the many services rendered by the station to the people of Edmonton—services so numerous that we have come to take them very much for granted.

Yours sincerely,

HARRY D. AINLAY,
Mayor of Edmonton.

THIS IS IT... the FM antenna which is responsible for the better method of transmitting and receiving radio programs. FM recreates voice and sound just as originally produced in studio and carries it into loudspeakers of your radio.

Explanation Of FM Sets Is Simple

What is FM?

That's a question many folks are asking.

FM, or frequency modulation, is a new and generally better method of transmitting and receiving radio programs.

It differs from AM, or amplitude modulation, in which you are accustomed, by the method used to superimpose the sound waves from the microphone for a free ride on the carrier wave.

Here's an oversimplified analogy that may help you understand what we're talking about.

Think of the transmitter as a pitcher throwing baseballs, which represent radio waves, against your house.

In one case he throws them at regular intervals, or frequencies, but he uses more force with some throws and less with others.

The various differences in power cause the varying sounds of the ball hitting the house, just as AM broadcasting uses differences in strength of radio waves to carry zoning.

PITCH VARIES

Then think of the pitcher again. This time, he throws each ball with exactly the same force, but varies the time between each throw. When he is doing this, he is changing the frequency. In the transmitter, the difference in frequency between the various radio waves is the difference in pitch.

In the radio receiver, the radio waves are picked up by an antenna and sent to a detector which separates the various frequencies. The detector then sends the signals to the speaker, which reproduces the sound.

When the radio waves are sent to the speaker, they are sent at the same frequency as they were when they were sent to the detector. This is why the sound is reproduced exactly as it was when it was sent to the detector.

He immediately went to work studying those waves and pioneered research to develop a new system which would eliminate such noises. The result was FM.

NOT ALL BETTER

Not all FM sets provide better reception than AM. The reason being that not all FM sets are well equipped. Some FM sets can receive all FM stations without providing full FM clarity. Other good TV, radio and workmanship can yield quality tone.

FM sets should be sensitive enough to receive all FM stations within its range. Sets manufactured by Stromberg-Carlson provide in frequency modulation, now see all the requirements necessary.

Hear Frequency Modulation on the

NEW VICTROLA Radio-Phonographs

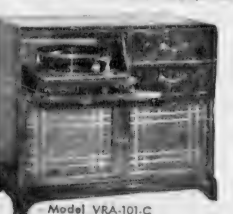

Superbly Distinguished

for Styling... Tone... Performance:

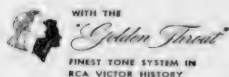

Model VRA-101-M

The glorious tone of the "Golden Throat" in a brilliantly modern cabinet! This fine Victrola radio-phonograph... in lustrous mahogany, walnut or blonde finishes... has RCA Victor FM, standard and shortwave reception. The record changer plays as many as 12 records automatically. There's ample storage space, too, for your favourite record selections. The changing... needle scratching are eliminated. No lid to lift, panels drop for off-stand record changer and radio unit. For top performance hear the Victrola VRA-101-M. A genuine Victrola radio-phonograph and an absolute beauty.

Model VRA-101-C

Here's a delightfully conventional-type cabinet, with charmingly graceful lines highlighted by the richly-stained walnut veneer finish. This superb Victrola radio-phonograph differs only in the cabinet from the modern-design model illustrated above. Radio chassis, record mechanism and all other features are identical. See this outstanding console Victrola today.

Lifeguards to Protect Alberta Beach Bathers

Elaborate precautions for protection of bathers were formulated at a meeting of the Alberta Beach Bathers' Club at the weekend.

Frank Drayton, member of the club, reported Monday that measures had been taken to provide lifeguards on the beach during holidays.

Also boat lookout stations will be maintained. Members of the club will be instructed in life saving and treatment of swimmers who have been immersed for lengthy periods.

An inhalator will be purchased by the club. Orders for the machine was telegraphed to Winnipeg Sunday.

Pianist Hanged In Toronto

TORONTO, June 29.—(CP)—Leslie R. Davidson, 29, was hanged today for the fatal shooting last March 1 of his sweetheart, 25-year-old Mrs. Margaret (Mickey) Meredith.

Jail officials reported that the Montreal-born pianist and entertainer was calm and resigned during his last hours in the death cell. One of his final acts was to write his estranged wife, Mrs. Freda Davidson, a farewell note.

PUBLIC NOTICE

SEALED applications will be received by the Superintendent, Jasper National Park, for the right to lease lots in both the old and new portions of the Lake Edith Subdivision, up to 12 o'clock noon on July 15, 1948. All lots will be disposed of by public competition with an upset price for each lot. To meet the demand from interested persons and to permit all concerned an equal opportunity of acquisition, a portion of the lots will be sold by tender and the balance by public sale. The lots will be disposed of by tender and public sale. The lots will be disposed of by tender and public sale. The lots will be disposed of by tender and public sale.

All applications should be accompanied by the upset price for the lot desired and in the case of those lots being disposed of by tender, by ten per cent of the additional amount the applicant is prepared to pay as a bonus. Refunds will be made in all cases where applications are not accepted.

Full particulars may be obtained from the Park Superintendent at Jasper, Alberta, or from Mr. E. D. Drummond, Agent, Northwest Territories Administration, Macleod, Edmonton.

June 15, 1948. J. SMART, Controller.

Tenders For School Houses

West Jasper Place School District No. 407.

SEALED TENDERS will be received by the Board of Trustees of the above school district at the office of the Secretary-Treasurer, 1115 St. Andrew St., Edmonton, Alberta, on Wednesday, July 1, 1948, for the erection of the following:

- (1) a six-roomed frame school building on a site in Block 1, North Jasper Place.
- (2) a six-roomed frame and stone school building on a site in Block 1, North Jasper Place.
- (3) a six-roomed frame school building on a site in Block 1, North Jasper Place.

In the West Jasper Place School District No. 407, after Plan No. SP 1046, plans and specifications may be obtained from the Secretary-Treasurer on payment of a deposit of \$5.00. The deposit will be refunded if the tender is not accepted. The deposit will be refunded if the tender is not accepted. The deposit will be refunded if the tender is not accepted.

NOTE: Tenders will also be received for erection of both buildings.

Notice to Creditors and Claimants

In the Estate of ERIC PEARSON (deceased) known as ERIC GLAD PEARSON, late of the Province of Alberta, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named ERIC PEARSON, late known as ERIC GLAD PEARSON, who died on the 30th day of May, A.D. 1948, are required to file with the undersigned Administrator by the 8th day of August, A.D. 1948, a full statement of their claims and of any securities held by them, and that the date of the meeting of the creditors of the estate of the deceased named the parties entitled thereto, having regard to the claims of which notice has been filed or which have been brought to the knowledge.

DATED this 23rd day of June, 1948. G. M. COBBAN, Acting Public Administrator, Administrator of the Estate of ERIC PEARSON (deceased) as ERIC GLAD PEARSON, late known as ERIC GLAD PEARSON, late of the Province of Alberta, deceased.

P.E.I. Votes For Sale of Liquor

Government Control Defeats Prohibition 20,019 to 7,285

CHARLOTTETOWN, June 29.—(CP)—For the first time since 1878, Prince Edward Islanders yesterday voted in favor of liquor sale and did it with a resounding 73 per cent of the vote.

With only a trace of the 229 polling booths still to report, government control defeated prohibition 20,019 to 7,285, revised figures showed.

MUCH PAPER WORK The government control measure, officially called the Temperance Act, cannot come into effect for several weeks because of the paper work involved, Premier Jones said last night.

It provides for a rationing system allowing each adult a bottle of liquor a week for a week. The act will be administered by a commission established last April. It will replace the "Callen" amendment, which gave Islanders the same amount of alcoholic beverage through doctors' prescriptions. The amendment was taken on a prohibition law in 1945.

60 PER CENT VOTED About 60 per cent of the island's voting strength of 32,000 turned out, despite predictions that participation would be low. In the general election last December, nearly 45,000 had cast ballots. Premier Jones said: "The people want a fairly strict provincial liquor law and have repudiated the prohibition law which has been relied upon for the last 50 years. I am confident that conditions will continue to improve, provided the people co-operate in the enforcement of the new temperance act."

TAX WRITE-OFF IS SUGGESTED

OTTAWA, June 29.—(CP)—George Cruickshank (L.—Fraser Valley) suggested last night in the Commons that the government write off the income tax owed for 1947 by people in the flood-devastated areas of the Fraser River valley. Minister McCann promised to bring the suggestion to the attention of the government.

Dr. McCann said his department had not the power to order such a write-off.

Girl Sentenced For Conspiracy

CALGARY, June 29.—(CP)—Hilda Halliday, 17, of the English and ship shop, yesterday was sentenced to six months in jail at hard labor for conspiracy to commit an indictable offense in the fake holdup of the shop May 22. About \$900 was taken from the shop's till May 22.

Similar charges against Ivan Schoenover and Gordon Phillips, both of Calgary, in connection with the same case, were dismissed last week when Miss Halliday said they were not the men taking part in the "holdup." In an earlier statement to police she had identified them as the men.

In sentencing the woman, Magistrate G. H. Rose said "you deliberately lied and perjured yourself in order to free the two men."

Man Is Remanded On Shooting Count

OYEN, Alta., June 29.—(CP)—Alex Kindrot, 29, was remanded without plea to July 3 when he appeared in police court here yesterday charged with wounding two men at Acadia Valley, Alta., last Friday. He will be held in city police cells at Calgary until appearing in court here July 3.

William Kolinski, 36, still in hospital at Empress, suffering from a bullet wound in the foot following a shooting affray on the main street of Acadia Valley last Friday, Douglas Ferguson, 23, who suffered minor chest wounds, has been released from hospital.

Youngster Commutes Daily To School By Commercial Plane

DEBORAH CONKLIN, 11, commutes daily to school 120 miles away.

She does it by commercial airplane, as resignedly bored as other youngsters riding a Sunday bus.

She attends a special University of Oregon class. It costs \$6 daily—\$5 for the plane fare, \$1 for taxi. Her father, Robert Conklin, manager of a timber company mill here, figures it is less than her board would be at the university.

Poisonous snakes are milked of their venom, which is used in manufacturing antivenom.

lands, protection and extension of fishing and trapping areas, medical and social services.

Johnny Callison, of the Michael Reserve at Villeneuve, was requested to preside at a banquet for the 10th consecutive term.

THIS COURSE IS CROWDED

MURFIELD, Scotland, June 29.—(AP)—The British open tournament is being played over two golf courses for the qualifying round—Murfield, the tough, and Gullane, the not-so-tough.

There's another difference between the two courses. Most of the Scottish onlookers are crowding the Gullane course.

Admission there is free. It's five shillings (\$1) at Murfield.

3,000 Die In Quake

TOKYO, June 29.—(AP)—Gen. Douglas MacArthur's headquarters reported today that 3,153 persons were killed in Fukui in yesterday's earthquake and fire.

The dead included an estimated 1,500 dead for devastated Fukui city alone. The toll figures included the toll in 39 villages as well as the prefectural capital.

All the headquarters also disclosed that 7,752 persons were seriously injured and 26,721 buildings were damaged. Of that number 6,506 were burned.

A report from British United Press correspondent Peter Kallacher, now in Fukui, said that the quakes still were continuing, but there was no new damage.

Some of the quakes were strong enough to be felt in Tokyo 250 miles away. Experts said minor tremors always followed a big quake.

Meanwhile, Allied and Japanese officials sent food and medicines to Fukui in an attempt to check a possible outbreak of disease among the survivors of the disaster.

Injured still were lying in the streets and workers were digging through the wreckage for victims when the second night after the quake settled over the three prefectures fronting on the sea of Japan.

Thousands of homeless men, women and children wandered among the ruins in search of food and shelter.

Edmontonians On Executive

Ten Edmontonians were elected to the executive of the Alberta Provincial Council of the St. John Ambulance at the recent meeting held in Lethbridge.

Julian Garret, Edmonton, was elected honorary treasurer, and E. C. Emmett, Edmonton, was named provincial secretary superintendent.

Elected to the executive committee were: A. W. Albright, W. Bruce, Miss E. A. Hastie, Dr. V. S. Kaufman, Dr. G. M. Little, Mrs. E. O. Ouellet, J. H. Fulton, and J. Ross Kelly.

Narcotics Valued At \$2 Millions Found

NEW YORK, June 29.—(AP)—Narcotics valued up to \$2,000,000 were found yesterday by officers who had spent four days digging through 200 tons of garbage.

A horde of workers sifted through garbage on a scow anchored off Staten Island when police got a tip that a panicky drug smuggler had tossed the drugs, wrapped in a burlap bag, onto the scow from a ship.

Six men are being held on narcotics smuggling charges.

\$150,000 Fire

PITTSBURGH, June 29.—(AP)—The explosion of naphtha and paint drums made a \$150,000 fire at the P. H. Schaeffer Chemical Company plant today. Two persons were injured in the two-hour fight.

Dies In Pulpit

NORTH HOLLYWOOD, Calif., June 29.—(AP)—Charles Babcock, 66 years a preacher, had told friends that "when I die I want to die in the pulpit."

Sunday night he suddenly interrupted his sermon, said "Folks you'll have to excuse me a minute," then dropped dead.

WEDNESDAY HALF-DAY at EATON'S

Your Last Minute Holiday Needs
